- Square College Code Camp (2014)

I love exploring data
         finding the stories
         designing interactions
         creating a flow of information
         helping others discover data
… and most of all, **I love color.**

EXPERIENCE

San Francisco Chronicle   Interactive Team

Work with two developer-journalists to lead data-driven investigative projects in the newsroom.

Data Visualization Intern   June - Sept. 2015

- Discuss, sketch, and prototype interactive web experiences to enhance the story or project.
- Clean and analyze large datasets. Design databases for high-quality, high performance digital project.

Google   Big Picture Team

A Google Research team that focuses on innovative ways to make large and/or unique sets of data visually accessible.

Software Engineer Intern   May - Aug. 2014

- Created high fidelity mocks for a comprehensive redesign of the Summary of Responses dashboard in Google Forms.
- Implemented two text visualization tools for Forms, also adapted versions for Google Charts and Search Quality teams.

Pearl Hacks   UNC - Chapel Hill

A hackathon for high school and college women in tech. 400 participants from across the U.S. Focus on mentorship, education and building an inclusive community.

Founder & Director   November 2013 - present

- Coordinated all logistics for the 36-hour event, including workshop schedule, food and transportation for 500 people.
- Developed website, web app, and all branding materials, managed social media, and worked with 30 corporate sponsors.

Microsoft   Windows User Experience

Rotated among program management, software engineering and testing roles for my project.

Explore Intern   May - Aug. 2013

- Worked with two other interns to design and implement a prototype for the next Windows OS.
